## I. INITIAL COMMENTS

Per the Federal Communications Commission MM Docket No. 93-248, in the matter of the Notice of Proposed Rule Making to amend Section 73.202(b), Table of Allotments, FM Broadcast Stations, (Pleasant City, Ohio), I, Peter L. Cea wish to submit the following documentation to serve as rectification and verification of my initial petition.

In this petition, I have requested the allotment of Channel 232A to Pleasant City, Ohio as the community's first aural transmission service. I have referenced the intention to apply for the channel, if allotted. All of the preceding statements remain to be true and valid.

## II. RECTIFICATION TO OMISSION OF AFFIDAVIT

Although the petition contained my address and intent in the body of the document, followed by my signature, the Federal Communications Commission noted that I had failed to include an affidavit verifying that the statements contained in the petition were accurate to the best of my knowledge. Section 1.52 of the Commission's Rules requires that the original of any document filed with the Commission by a party not represented by counsel be signed and verified by the party and his/her address stated.

This is to serve notice that I, Peter L. Cea ("petitioner"), verify that the statements and submittals contained in my initial petition dated August 9, 1993, and in this comment documentation to be accurate to the best of my knowledge.

NOTARY PUBLIC, STATE OF OHIO  
MY COMMISSION EXPIRES JAN. 27, 1998

### III. ALLOTMENT DEFINITION

As described in MM Docket No. 93-248, the proposed Channel 232A to Pleasant City, Ohio can be allotted in compliance with the Commission's minimum distance requirements. The coordinates for Channel 232A at Pleasant City are Latitude 39-53-22 North and Longitude 81-29-47 West.

### IV. REQUIRED SHOWING

In observance to Appendix 2. of MM Docket No. 93-248 requirements, this document shall contain a copy of my former pleading. It shall represent the position in which I continue to support. In addition, I restate that my intention is to apply for the channel if it is allotted and, if authorized, build a station promptly.

### V. COMMENT SUMMARY

I hereby conclude this document and submit it to the Commission before the cutoff date for comments, November 19, 1993. As of November 1, I have not been served with any public comments.

The following is a copy of my original petition, as stated in the body of this comment.

**SECTION 1.401**  
**PETITION FOR AMENDMENT OF**  
**THE FM TABLE OF ASSIGNMENTS**

**PETITIONER: PETER L. CEA**  
**707 GREEN COOK RD.**  
**SUNBURY, OH 43074**

I. INTRODUCTION TO THE PETITIONING PARTY

The intention of this pleading is to construct a valid petition to amend the FM Table of Assignments (47 CFR 73.202). The Code of Federal Regulations 47 has been used as a guideline to construct this document.

Being Peter L. Cea, who will be referred to as the "party", who chooses to participate in the timely filing of this petition for the rulemaking as defined in section 1.400. For the record, the party currently resides and corresponds from 707 Green Cook Road, Sunbury, Ohio 43074-9761.

To establish the reputable character of the party, it should be known that this petition conforms to the specific rulemaking requirements of sections 1.49, 1.52, and 1.42(e). Due to the absence of any current channel assignment changes, section 1.401(d) will not pertain to this petition. It will be the review of this document to decide the validity of all statements held within section 1.401(e).

To satisfy the party's statement of interest to this petition, let it be known that Peter L. Cea seeks channel assignment should the results warrant amending the FM Table of Assignments. Additionally, should the Commission give assignment preference to the petitioning party, it is the intention of the party along with its assigns to continue with interest to seek the assignments construction permit.

## II. THE LOCATION AND ASSIGNMENT PETITIONED

Considering the Table of FM Assignments and Minimum distance separation between stations (section 73.207), the channel number concerning this petition is channel 232 or 94.3 Mhz. This frequency would be assigned to the principal community of Pleasant City, Ohio.

Using the distance computations and reference points supplied from the F.C.C. database of FM Assignments, the proper station separations are maintained as regulated by section 73.207. The party submits the proper calculations as evidence in this petition.

## III. PRINCIPAL COMMUNITY REQUIREMENTS

The coordinates chosen for the proper distance between stations are located approximately five and one half kilometers southeast of the principal community to be served. Although this would not constitute the actual antenna location, this site possesses the ability to meet the transmission requirements and area of coverage outlined in section 73.315.

## IV. ISSUES CONCERNING PART 17

This petition will address any possible obstructions to air traffic safety due to antenna structure location as regulated by the Federal Aviation Administration. The coordinates of the petitioned assignment are approximately no less than 4.5 miles from the nearest municipal airport (Logan County Airport). By

the interpretation of section 17.7, an antenna structure appropriate in height for a Class A station would not jeopardize air traffic. Notification and construction approval by the Federal Aviation Administration would be the responsibility of the successful applicant.

V. SUMMARY

To the best of my knowledge, it is believed both through interpretation of the Code of Federal Regulations and distance separations through computer calculations, the channel assignment corresponding to 232 (94.3 Mhz) would serve the public interest to its principal and surrounding communities. The party has attempted to build the proper argument for rulemaking to change the FM Table of Assignments. As consistent with the Federal Communications Commission, the necessary engineering and applications for this assignment will be required for contour protection of all stations within the vicinity of the proposed station.

All comments pertaining to this petition and their certificates of service should be forwarded to:
